

## GOALS OF THE INDUSTRY BOARD

- » Strengthen communication with imaging technology users and imaging facilities, enabling timely understanding of users' needs
- » Organize "One Voice" activities to political community at the national and European level (Brussels) in order to increase bioimaging market
- » Stay up to date with use of technology and software at Euro-BioImaging Nodes and needs of researchers
- » Participate in Euro-BioImaging training activities
- » Cooperate with Euro-BioImaging Nodes on development and testing of novel technologies
- » Create a platform for industry-science cross collaboration

## INDUSTRY BOARD MEMBERS

# BENEFITS OF DIFFERENT INDUSTRY BOARD MEMBERSHIP LEVELS

## Platinum

### Support and information

- Information on technological status of Euro-Biolmaging Nodes
- Access to tailored usage data and statistics
- Information on Euro-Biolmaging training programs
- Individually tailor proposals on useful activities and interactions with Euro-Biolmaging community
- Representation of industrial activities and opinions to national and EU political community
- Participation in common lobbying activities e.g. at the national and European level (Brussels)
- Reports from the users, information on potentially useful samples, success and satisfaction rate
- Personal support of industry users of Euro-Biolmaging services

### Marketing

- Appearance in promotional public Industry Board material
- Company logo and advertising material at Euro-Biolmaging events
- Company logo on Euro-Biolmaging website

### Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

## Gold

### Support and information

- Information on technological status of Euro-Biolmaging Nodes
- Personal support of industry users of Euro-Biolmaging services
- Information on Euro-Biolmaging training programs
- Representation of industrial activities and opinions to national and EU political community

### Marketing

- Company logo on Euro-Biolmaging website
- Appearance in promotional public Industry Board material

### Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

## Silver

### Support and information

- Information on Euro-Biolmaging training programs

### Marketing

- Company logo on Euro-Biolmaging website
- Appearance in promotional public Industry Board material

### Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

### WHAT IS EURO-BIOIMAGING?

Euro-Biolmaging (EuBI) is the European open access infrastructure for biological and medical imaging technologies. EuBI will provide open user access to state-of-the-art imaging technologies for life scientists. In addition, EuBI will offer image data support and training possibilities, and create environment for technology development and testing. The infrastructure will consist of a set of complementary, geographically distributed Nodes - specialized and knowledgeable imaging facilities.

» 29 Node Candidates in 11 countries and at EMBL are starting EuBI's interim operation in May 2016

» 15 countries (AT, BE, BG, CZ, ES, FI, FR, IL, IT, NL, NO, PL, PT, SK, UK) and the European Molecular Biology Laboratory (EMBL) are preparing Euro-Biolmaging for construction

» 25 national imaging communities and over 3000 stakeholders are supporting EuBI.
