

## Euro-BiolMaging is:

Open to all scientists from academia and industry

Open to any career stage and area of research

Open to users of any level of expertise (training available)

Publicly funded, not-for-profit

## We power research in 25+ scientific domains

Archaeology

Biophysics

Cancer

Cardiovascular

Cell biology

Developmental biology

Disease understanding

Environmental biology

Food science

Genome biology

Immunology

Infectious diseases

Marine biology

Materials science

Metabolism

Method development

Microbiology

Neuroscience

Organoids

Parasitology

Physiology

Plant biology

Regenerative medicine

Stem cells

Treatment development

Zoology

**...and counting!**

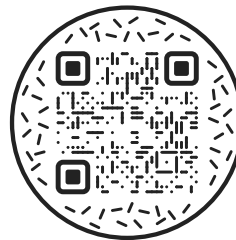

## We support your imaging project

From advice on imaging technologies and image data analysis to funding opportunities - Euro-BiolMaging's mission is to provide researchers with imaging services that bridge biological and biomedical imaging and facilitate innovative and world-class research.

Whatever the scale of your imaging, Euro-BiolMaging will give you the tools and support to explore and answer your research questions. Application procedure is quick, easy and efficient.

## What we offer

SAMPLE CHARACTERIZATION

ELECTRON MICROSCOPY

LIGHT MICROSCOPY

ANIMAL & PLANT  
IMAGING

CORRELATIVE &  
MULTIMODAL IMAGING

HUMAN  
IMAGING

IMAGE DATA ANALYSIS

### Imaging across scales

From molecules to humans, Euro-BiolImaging can guide you to the right facility for your scientific question.

### Data services

Get help with image data analysis, FAIRification & sharing of your data.

### Funding

Funding possibilities to support projects & travel costs.

### Trusted partner

Work with quality-controlled facilities and service providers.

### Advice

Consult with experts on your imaging needs – with full confidentiality.
